Chennai, India

Summary

I am a collaborative and driven individual who is always eager to upskill and stay current with market trends. As a good communicator and team player, I thrive in group settings and enjoy taking on leadership roles. My commitment to continuous learning and my ability to effectively lead and work within a team make me a valuable asset in any project or organization.

Education

SRM IST B.tech · Electronics and computer · Chennai	Sep 2021 - Present 8.99
La Chatelaine Junior College 12th · CBSE · Chennai	Jun 2020 - May 2021 84.1
La Chatelaine Junior college 10th · CBSE · chennai	Jun 2018 - May 2019 84.6

Experience

VMG digital certificate Software developer · front end intern · INTERN	Dec 2023 - Jan 2024
Learned Angular and front-end development basics, including:	
• HTML/CSS for structuring and styling web pages • JavaScript/TypeScript for dynamic and interactive content • Responsive design principles to ensure usability across devices • Component-based architecture in Angular • Two-way data binding for synchronization between the model and the view • Service integration for handling business logic	
Completed mini-projects :	
• Task management, Employee dashboard integrated with Firebase and implemented GET, and POST controls using HTTP client and angular routing	

Projects

My PORTFOLIO · Javascript, Angular, bootstrap, node.js, angular material, VS code This portfolio application showcases my work and skills as a web developer. Tools and Technologies Used:	Aug 2024 - Present Web development
• Angular • Angular Material • TypeScript • Font Awesome • Firebase: For backend services including hosting and real-time database. • CSS & Flexbox/Grid • Version Control: Proficiency in using Git for version control and collaborative development. • Backend Integration: Experience in connecting the frontend with backend services using REST APIs and Firebase.	

Waste management with AI sorting | [certificate](#)
University Team · Arduino Uno, sensors, python, CNN, tensor flow
Objective: To automate the sorting of waste into degradable and non-biodegradable categories for better waste management.
Implementation:

- **Camera module** to capture images of the waste.
- **Servo motor** to physically sort the waste.
- **CNN (Convolutional Neural Network)** for image classification.
- **TensorFlow** as the machine learning framework.
- **Python** for scripting and model training.
- **Embedded systems** for hardware control.

Outcome: Successfully automated waste sorting with high accuracy, enhancing the efficiency of waste management processes.

Feb 2024 – Mar 2024
Machine learning and IoT

Do-it-now
· Angular
Objective: Create a to-do list application with features to add, edit, and delete tasks
Tools Used:

- **Angular** for the framework
- **Angular Material** for icons and UI components

Feb 2024 – Feb 2024
SPA

Conferences and Workshops

TVS IoT training
TVS industrial services

Mar 2023

Skills

javascript, C++, CSS, HTML, Angular, typescript, IoT, Python, Bootstrap

Languages

English [Professional Working Proficiency], Tamil [Native Proficiency], Hindi [Limited Working Proficiency]
